

BeneVocon

COOKIE NOTICE

EFFECTIVE DATE	LAST UPDATED
01.06.2025	26.08.2026

NOTICE SUMMARY

BeneVocon™ uses cookies and comparable browser technologies to operate and secure benevocon.com, maintain requested sessions and account features, remember cookie choices, and, only where enabled, support optional functionality, audience measurement, or third-party content. Strictly necessary cookies may operate where a valid non-consent legal basis applies. Other categories remain disabled until the visitor makes the required choice. The live Cookie Settings panel identifies the technologies currently in use.

CONTENTS

1	Identity, Scope And Definitions	Articles 1-4
2	Cookie Classifications	Articles 5-10
3	Use On The BeneVocon™ Website	Articles 11-18
4	Legal Bases And Consent	Articles 19-26
5	Cookie Banner And Preference Controls	Articles 27-32
6	Cookie Register, Duration And Records	Articles 33-35
7	Third Parties, Transfers And Security	Articles 36-37
8	Rights, Updates And Contact	Articles 38-40

SECTION 1 - IDENTITY, SCOPE AND DEFINITIONS

Article 1 - Purpose of This Notice. This Cookie Notice explains how cookies and comparable browser technologies may be used through benevocon.com and connected BeneVocon™ website features, what choices are available, and how those choices may be changed.

Article 2 - Website Operator and Ownership. For the purposes of this Notice, the website operator and data controller is BeneVocon™. This Cookie Notice belongs to BeneVocon™. BeneVocon™ is an independently operated virtual Roblox development studio and online project team.

Article 3 - Who and What This Notice Covers. This Notice applies to visitors, Roblox-connected users, applicants, reviewers, workers, clients, and other persons who access benevocon.com or an official BeneVocon™ web feature. External websites reached through a link apply their own cookie and privacy notices.

Article 4 - Definitions. A cookie is a small text file placed on or read from a browser or device. Similar technologies may include local storage, web storage, tags, or comparable identifiers. Where those technologies process personal data for a similar purpose, BeneVocon™ applies the transparency and choice principles in this Notice unless a separate notice is provided.

SECTION 2 - COOKIE CLASSIFICATIONS

Article 5 - Session and Persistent Cookies. Session cookies normally expire when the browser session ends. Persistent cookies remain until their stated expiry date, until the visitor deletes them, or until BeneVocon™ withdraws them. A longer lifetime must be connected to a genuine and proportionate purpose.

Article 6 - First-Party and Third-Party Cookies. First-party cookies are placed by the domain the visitor is using. Third-party cookies are placed or accessed by another provider whose service is integrated into the website. The live Cookie Register identifies the relevant party for each active cookie.

Article 7 - Strictly Necessary Cookies. Strictly necessary cookies support functions such as security, authentication, session continuity, load distribution, form submission, fraud prevention, and the storage of cookie choices. They must not be reused for advertising or unrelated tracking.

Article 8 - Functional and Preference Cookies. Functional cookies support optional preferences or convenience features, such as remembering a selected interface setting. Where the feature is not clearly and specifically requested by the visitor, the cookie remains disabled until the required choice is made.

Article 9 - Performance and Analytics Cookies. Analytics cookies may measure visits, navigation, errors, or feature performance so the website can be improved. They are not activated merely because the website is opened and are used only where an appropriate legal basis and any required visitor choice exist.

Article 10 - Advertising, Marketing and External Media Cookies. Cookies used for behavioural advertising, campaign measurement, cross-site tracking, social tracking, or non-essential embedded media are optional. Where consent is required, they remain disabled until the visitor actively selects the relevant category or feature.

SECTION 3 - USE ON THE BENEVOCON™ WEBSITE

Article 11 - Core Website Operation. Cookies may be used to deliver requested pages, route requests, maintain basic navigation, preserve temporary form state, prevent technical failures, and provide features that the visitor has expressly requested.

Article 12 - Security, Authentication and Form Continuity. Limited identifiers may be used to protect sessions, prevent request forgery, detect abnormal activity, reduce spam, prevent duplicate submissions, and maintain secure form or account operations. Security cookies are limited to the security purpose for which they are used.

Article 13 - Roblox Account Connection. When a visitor chooses to connect or verify a Roblox account, short-lived identifiers may be used to preserve the request, prevent impersonation or forgery, and return the visitor to the requested BeneVocon™ page. Roblox may use its own cookies on its own domains under its own notices. BeneVocon™ does not request the visitor's Roblox password.

Article 14 - Reviews, Applications and Preferences. Cookies may support review submission, applicant forms, account verification, moderation controls, and settings deliberately selected by the visitor. They may not be used to expand a requested feature into unrelated profiling.

Article 15 - Consent-Management Cookie. A strictly limited cookie may remember whether optional categories were accepted, rejected, or configured. This prevents the banner from appearing unnecessarily and helps demonstrate the visitor's recorded choice. The lifetime of this cookie must be proportionate.

Article 16 - Optional Analytics and Measurement. If BeneVocon™ activates an analytics service, the relevant provider, purpose, cookie name, duration, transfer information, and legal basis must first appear in the live Cookie Register. Consent-based analytics remain inactive until consent is received.

Article 17 - External Content and Plugins. A video, social feature, anti-abuse tool, or other external component may cause another provider to use cookies. Non-essential external content should not place tracking cookies before the required choice. Opening a separate external website is governed by that provider's own notice.

Article 18 - No Hidden or Unrelated Use. BeneVocon™ must not classify an optional tracking technology as strictly necessary merely for convenience. Cookie data may not be used for an undisclosed purpose that is incompatible with the purpose shown to the visitor.

SECTION 4 - LEGAL BASES AND CONSENT

Article 19 - Case-by-Case Legal Basis. Each cookie that processes personal data must be assessed separately. Depending on the activity, processing may rely on performance of an agreement, compliance with a legal obligation, establishment or protection of a right, a properly balanced legitimate interest, or explicit consent where required. The live Cookie Register states the applicable basis.

Article 20 - Necessary Cookies Without Consent. A cookie may operate without consent only when a valid non-consent processing condition applies, including where the cookie is strictly necessary for a communication or a service expressly requested by the visitor. This exception does not permit marketing, behavioural advertising, or unrelated observation.

Article 21 - Consent-Required Cookies. Where no valid non-consent condition applies, an optional cookie may be placed or read only after the visitor gives a specific, informed, freely given, and active choice. The cookie must remain inactive before that choice.

Article 22 - No Implied or Blanket Consent. Opening the website, scrolling, closing the banner, remaining silent, or continuing to browse does not constitute consent. A general statement such as 'I accept all data processing' is not used as a substitute for a category-specific cookie choice.

Article 23 - Specific and Granular Choices. Visitors must be able to decide separately between relevant optional purposes, such as functional, analytics, marketing, or external-media cookies. Acceptance of one optional purpose does not automatically authorize another.

Article 24 - Notice and Consent Are Separate. This Cookie Notice provides information and is not itself a consent request. Acceptance of the Privacy Notice, Website Terms, Employee Policy, an application, or another agreement does not grant consent for optional cookies. Any required consent is requested separately through the cookie interface.

Article 25 - Withdrawal and Changes of Choice. A visitor may withdraw or change a consent-based cookie choice through Cookie Settings as easily as the original choice was given. Withdrawal applies to future use and does not by itself invalidate processing lawfully completed before the change.

Article 26 - Effect of Refusal or Blocking. Refusing optional cookies does not remove access to the core website where that access can reasonably be provided without them. Optional features may be unavailable when their required optional technology is refused. Blocking strictly necessary cookies through browser settings may prevent requested functions from working.

SECTION 5 - COOKIE BANNER AND PREFERENCE CONTROLS

Article 27 - First-Layer Banner. When cookies process personal data, visitors are informed at the point the processing begins or before it begins. Where optional cookies are available, the first-layer banner provides a short explanation, a direct link to this Notice, and access to Cookie Settings before those optional cookies are activated.

Article 28 - Equal Choices and No Dark Patterns. The banner must present 'Accept All', 'Reject All', and 'Preferences' with comparable visibility, size, colour, and ease of use. Pre-selected optional categories, confusing wording, hidden rejection controls, or repeated pressure intended to manipulate the visitor are not permitted.

Article 29 - Default Settings. Optional categories are disabled by default. Strictly necessary cookies may be shown as always active where they are genuinely necessary and supported by a valid legal basis, but their purpose and duration must still be explained.

Article 30 - Continued Access and Cookie Walls. BeneVocon™ does not make access to ordinary website content conditional on accepting unnecessary cookies. A restriction involving optional cookies may be used only where it is lawful, proportionate, transparently explained, and does not undermine a freely given choice.

Article 31 - Access to Settings and Preference Renewal. Cookie Settings must remain reasonably accessible from the website after the first visit. A choice may be requested again after a material change or at a proportionate interval, but the visitor should not be asked so frequently that consent fatigue or pressure is created.

Article 32 - Browser and Device Controls. Visitors may also delete or block cookies through browser or device settings. Those controls may affect website functions and do not replace BeneVocon™'s own duty to provide information and, where required, obtain a valid choice. Deleting a browser cookie may not automatically delete related server-side records that must lawfully be retained.

SECTION 6 - COOKIE REGISTER, DURATION AND RECORDS

Article 33 - Live Cookie Register. The website's live Cookie Settings panel or Cookie Register forms an integral part of this Notice and identifies each active cookie or equivalent technology, including its name, provider, first- or third-party status, category, purpose, duration, legal basis, and relevant transfer information. A technology not accurately listed must not be activated as an optional cookie.

Article 34 - Duration and Data Minimization. Cookie lifetimes are limited to the shortest period reasonably required for the stated purpose. Session cookies should normally end with the session. Persistent cookies must have a defined expiry, be reviewed periodically, and be removed when their purpose or legal basis ends.

Article 35 - Consent and Preference Records. BeneVocon™ may retain limited records showing the visitor's cookie categories, time of choice, notice state, and technical proof necessary to manage or demonstrate that choice. These records are not used for unrelated marketing and are retained only for a proportionate period.

SECTION 7 - THIRD PARTIES, TRANSFERS AND SECURITY

Article 36 - Third-Party Providers and International Transfers. Where a third-party provider is configured, its identity and role must be disclosed. A provider may process data under its own notice or under BeneVocon™'s instructions, depending on the arrangement. Any transfer outside Türkiye must have an applicable lawful transfer mechanism and must be described accurately rather than assumed.

Article 37 - Security, Incidents and No Sale. BeneVocon™ applies reasonable technical and administrative measures to cookie identifiers and related records. Personal data obtained through cookies is not sold, rented, or traded for money. Suspected unauthorized access or disclosure is investigated and handled under the Privacy Notice and applicable incident procedures.

SECTION 8 - RIGHTS, UPDATES AND CONTACT

Article 38 - Rights and Requests. Where cookie identifiers relate to an identifiable person, that person may exercise the applicable rights described in the BeneVocon™ Privacy Notice, including requesting information, correction, deletion where the conditions are met, and objection to certain processing. A request may be sent to admin@benevocon.com with enough information to identify the relevant record.

Article 39 - Updates and the 48-Hour Notice Rule. BeneVocon™ may update this Notice, the cookie categories, or the providers as website and operational needs change. The updated text is published on the website. Persons materially affected by an implemented change are informed through an appropriate official channel no later than 48 hours after implementation. Where prior notice or prior consent is legally required, the stricter requirement applies before the new processing begins.

Article 40 - Contact, Dates, Language and Final Terms. Questions about cookies or preferences may be sent to admin@benevocon.com. The Effective Date and Last Updated date at the beginning identify the current public text. English is the official website version; a translation may be provided for accessibility. Mandatory law prevails over any inconsistent wording in this Notice.
