NOTICE SUMMARY

BeneVocon™ is an independently operated virtual Roblox development studio and online project team. This Privacy Notice explains how personal data is handled through the BeneVocon™ website, connected forms, Roblox account features, applications, reviews, payments, communications, and official studio systems. This Notice provides information and is not a consent form.

CONTENTS

1	Identity, Scope And Legal Framework	Articles 1-4
2	Personal Data Categories	Articles 5-8
3	Sources And Collection Methods	Articles 9-12
4	Purposes And Legal Bases	Articles 13-17
5	Website And Studio Features	Articles 18-22
6	Cookies And External Technologies	Articles 23-25
7	Sharing And International Transfers	Articles 26-29
8	Retention And Security	Articles 30-33
9	Minors, Rights And Requests	Articles 34-37
10	Updates, Contact And Final Terms	Articles 38-40

SECTION 1 - IDENTITY, SCOPE AND LEGAL FRAMEWORK

Article 1 - Purpose of This Notice. This Privacy Notice explains how personal data is collected, used, disclosed, retained, and protected through benevocon.com, connected forms, Roblox account features, applications, reviews, communications, payments, and official BeneVocon™ studio systems.

Article 2 - Data Controller. For the purposes of Türkiye's Law No. 6698 on the Protection of Personal Data (KVKK), the data controller for the website and official studio systems covered by this Notice is BeneVocon™. This Privacy Notice belongs to BeneVocon™. BeneVocon™ is an independently operated virtual Roblox development studio and online project team.

Article 3 - Who This Notice Covers. This Notice applies to website visitors, Roblox-connected users, applicants, reviewers, community members, clients, workers, contractors, contributors, and any other natural person whose personal data is processed by or on behalf of BeneVocon™.

Article 4 - Applicable Framework and Definitions. This Notice is primarily prepared under KVKK. Mandatory privacy rules of another jurisdiction may also apply where legally required. "Personal data" means information relating to an identified or identifiable natural person. "Processing" includes collecting, recording, storing, using, sharing, updating, restricting, deleting, or otherwise handling personal data.

SECTION 2 - PERSONAL DATA CATEGORIES

Article 5 - Account and Identity Data. BeneVocon™ may process a Roblox username, Roblox User ID, display name, avatar or profile link, Discord username, email address, legal name, country or region, and age or age range where reasonably necessary. BeneVocon™ does not request Roblox, Discord, email, or payment account passwords.

Article 6 - Application, Work and Transaction Data. This may include application answers, experience, portfolio links, availability, role information, evaluations, project access, agreements, task records, payment amount, payment method, transaction reference, and tax or invoicing information where required. Full payment-card details should not be submitted through ordinary BeneVocon™ forms.

Article 7 - User Content and Communications. This may include reviews, ratings, comments, support requests, application statements, reports, attachments, moderation records, emails, Discord messages submitted to official channels, and other content a person chooses to provide to BeneVocon™.

Article 8 - Technical, Security and Sensitive Data. Technical data may include IP address, device and browser information, operating system, timestamps, session or cookie identifiers, page actions, authentication events, error logs, access logs, and suspected abuse or security indicators. BeneVocon™ does not intentionally request special-category data such as health, biometric, religious, political, sexual-life, or criminal-record information unless a specific lawful need is clearly explained.

SECTION 3 - SOURCES AND COLLECTION METHODS

Article 9 - Data Provided Directly. Personal data is collected when a person completes a form, connects an account, applies for a role, submits a review, sends a message, enters an agreement, reports an issue, receives a payment, or otherwise communicates with BeneVocon™.

Article 10 - Data Received from Roblox and Connected Services. When a person connects or verifies a Roblox account, BeneVocon™ may receive the account information permitted by that person and by Roblox, such as username, User ID, display name, avatar, profile link, and authentication identifiers needed to maintain a secure session. Connected services process data under their own privacy notices as well.

Article 11 - Automatically Collected Data. Website servers and security systems may automatically generate technical logs when the site or a connected feature is accessed. Essential session and security data may be collected without a separate consent where another lawful processing condition applies.

Article 12 - Public and Third-Party Sources. BeneVocon™ may review information that a person has deliberately made public, including a public Roblox profile, portfolio, GitHub repository, public project reference, or public professional profile. Public availability does not authorize unrelated or unlimited use; the information is used only for a relevant and legitimate purpose.

SECTION 4 - PURPOSES AND LEGAL BASES

Article 13 - Website and Account Operations. Personal data may be processed to operate and secure the website, verify Roblox account ownership, maintain sessions, provide requested features, prevent duplicate or fraudulent activity, remember necessary preferences, diagnose errors, and improve reliability.

Article 14 - Applications and Studio Relationships. Personal data may be processed to review QA, employee, contractor, contributor, or commission-related applications; communicate decisions; assign roles; manage access; administer project work; keep required records; and make or verify agreed payments.

Article 15 - Reviews and Community Features. Personal data may be processed to receive, verify, publish, display, moderate, investigate, and remove reviews or other user content. Public display is limited to the fields clearly shown to the person before submission, such as Roblox username, avatar, rating, and review text.

Article 16 - Security, Moderation and Legal Protection. Personal data may be processed to prevent abuse, protect minors and users, investigate security incidents, enforce studio rules, respond to platform notices, establish or defend legal claims, preserve evidence, and comply with lawful requests. BeneVocon™ does not intend to make decisions producing legal or similarly significant effects solely through automated processing without meaningful human review.

Article 17 - Legal Bases and Separate Consent. Depending on the activity, processing may rely on the formation or performance of an agreement, compliance with a legal obligation, establishment or protection of a right, BeneVocon™'s legitimate interests where fundamental rights are not harmed, data deliberately made public for the relevant purpose, or explicit consent where required. This Notice is not itself a consent request. Any required consent must be presented separately, specifically, and freely.

SECTION 5 - WEBSITE AND STUDIO FEATURES

Article 18 - Roblox Account Connection. Roblox account connection may be used to confirm account ownership, reduce impersonation, display approved profile information, support reviews, and protect site features. Disconnecting an account stops future connected use but does not automatically erase records that must be retained for security, disputes, or legal obligations.

Article 19 - Applications and Candidate Records. Application data is accessible only to authorized reviewers and decision-makers who need it. BeneVocon™ may contact references or verify public portfolio claims when reasonably necessary. An unsuccessful application is not used for unrelated advertising without a separate lawful basis.

Article 20 - Reviews, Ratings and Public Profiles. A review may be displayed with the reviewer's Roblox username, avatar, rating, and submitted text. BeneVocon™ may remove spam, impersonation, personal information, unlawful content, harassment, or content unrelated to the review feature. A verified reviewer may request deletion or correction, subject to identity verification and lawful retention needs.

Article 21 - Contact, Support and Official Communications. Messages are used to answer questions, handle reports, deliver application or service updates, keep an appropriate support record, and protect against repeated abuse. Necessary service, security, contractual, or policy communications are not treated as optional marketing.

Article 22 - Payments and Financial Records. Where BeneVocon™ makes or receives an agreed payment, limited payment identifiers and transaction evidence may be processed to complete the payment, prevent fraud, resolve disputes, and satisfy applicable accounting or legal duties. Payment providers independently process data under their own terms and privacy notices.

SECTION 6 - COOKIES AND EXTERNAL TECHNOLOGIES

Article 23 - Essential Cookies and Similar Storage. The website may use strictly necessary cookies or similar technologies for authentication, session continuity, fraud prevention, security, load distribution, and preferences expressly requested by the user. Disabling these technologies may prevent account connection or other essential functions from working.

Article 24 - Optional Analytics and User Choices. Non-essential analytics, performance, personalization, or marketing technologies are not activated unless a valid legal basis and any required user choice have been provided. Where consent is required, optional categories must remain off until selected, and rejecting them must be as accessible as accepting them. Active cookies, providers, purposes, and durations should be listed in the website cookie interface or a separate Cookie Notice.

Article 25 - Third-Party Technologies and Links. BeneVocon™ may use services such as Roblox, Discord, web hosting, email delivery, anti-spam or security tools, analytics tools, and payment providers where configured. External websites and platforms control their own processing. BeneVocon™ remains responsible for its own processing and for selecting and instructing service providers where applicable.

SECTION 7 - SHARING AND INTERNATIONAL TRANSFERS

Article 26 - Authorized Recipients. Personal data may be disclosed only as reasonably necessary to authorized BeneVocon™ management, project leads, reviewers, moderators, service providers, payment providers, professional advisers, project owners, or competent public authorities. Public review information is disclosed to website visitors as described before submission.

Article 27 - No Sale of Personal Data. BeneVocon™ does not sell, rent, or trade personal data for money. Personal data is not disclosed for unrelated targeted advertising. A future change to this position would require a clear prior update and any legally required consent.

Article 28 - International Transfers. Roblox, Discord, hosting, email, security, analytics, or payment services may process data outside Türkiye. Where personal data is transferred abroad, BeneVocon™ must use a transfer mechanism permitted by Article 9 of KVKK and other applicable law, such as an adequacy decision, appropriate safeguards including an applicable standard contract, or a specific statutory exception. Separate consent will be requested where it is legally required; publication of this Notice alone is not consent to an international transfer.

Article 29 - Project, Website or Service Transfer. If a BeneVocon™ project, website function, or service is lawfully transferred to another operator, relevant personal data may be transferred only where a valid legal basis exists, the transfer is limited to what is necessary, and affected persons are informed when required. The recipient must be subject to appropriate confidentiality and data-protection duties.

SECTION 8 - RETENTION AND SECURITY

Article 30 - Retention Principles. Personal data is retained only for the period necessary for the stated purpose, applicable legal duties, payment or accounting records, security, dispute resolution, or the establishment and protection of rights. When the reason for processing ends, data is deleted, destroyed, or anonymized in accordance with applicable requirements.

Article 31 - Practical Retention Schedule. Unless a longer period is legally required or justified by an active dispute: unsuccessful application records are normally retained for up to 12 months after the decision; connected-account data is normally retained while the feature is used and for up to 90 days after disconnection; removed reviews and ordinary support records may remain in restricted backups for up to 90 days and two years respectively; ordinary security logs are normally retained for up to 12 months; and agreements, payment records, or evidence are retained for the applicable legal or claims period.

Article 32 - Security Measures. BeneVocon™ applies measures appropriate to the scale and risk of its processing, which may include limited access, least-privilege permissions, strong authentication, multi-factor authentication where available, encrypted transmission, secure backups, access logging, confidentiality duties, software updates, incident procedures, and review of service-provider access.

Article 33 - Security Incidents and Data Breaches. Suspected loss, unauthorized access, exposure, or misuse of personal data is investigated and contained without unnecessary delay. BeneVocon™ will notify the competent authority and affected persons where required by law. A suspected incident may be reported to admin@benevocon.com without publicly disclosing exploitable details.

SECTION 9 - MINORS, RIGHTS AND REQUESTS

Article 34 - Minors and Guardian Involvement. Because Roblox communities may include minors, BeneVocon™ limits collection to information reasonably needed for the relevant feature or studio relationship. Minors should not submit a home address, school information, phone number, identity document, financial data, private images, or other unnecessary sensitive information. Age verification or parent or guardian involvement may be required where the activity or applicable law requires it.

Article 35 - Rights Under Article 11 of KVKK. A data subject may ask whether personal data is processed; request information about processing; learn the purpose and whether data is used consistently with that purpose; learn the recipients inside or outside Türkiye; request correction; request deletion or destruction where conditions are met; request notification of correction or deletion to relevant recipients; object to a result arising exclusively from automated analysis that is unfavorable to the person; and request compensation for damage caused by unlawful processing.

Article 36 - How to Submit a Privacy Request. A request may be sent to admin@benevocon.com from an email address previously provided to and recorded by BeneVocon™, or through another application method announced on the website. The request should identify the requester, describe the requested action, and include enough information to locate the relevant record, such as Roblox username or User ID. BeneVocon™ may request proportionate verification and should not be sent passwords or unnecessary identity documents.

Article 37 - Response Time and Complaints. Requests are answered as soon as reasonably possible and no later than 30 days where KVKK applies. Requests are normally free; a permitted fee may apply only where the official tariff allows it. A person may complain to the Personal Data Protection Board after first applying to the data controller and meeting the applicable procedural conditions.

SECTION 10 - UPDATES, CONTACT AND FINAL TERMS

Article 38 - Notice Is Not Consent. This document fulfills an information and transparency purpose. A person is not required to “accept” the Privacy Notice merely to be informed. Continued use of the website does not convert this Notice into explicit consent. Where explicit consent is legally necessary, BeneVocon™ will request it through a separate and specific choice.

Article 39 - Changes and Forty-Eight-Hour Publication Rule. A material new processing activity will be explained before or when it begins, as required by law. Updates to this Notice will be published on the website, and affected users or studio members will be informed through an appropriate official channel no later than 48 hours after an implemented change. Where prior notice or prior consent is legally required, that stricter requirement applies before the processing begins.

Article 40 - Contact, Dates and Language. Privacy questions and requests may be sent to admin@benevocon.com. The effective date and last-updated date shown at the beginning of this Notice identify the applicable public text. The English text is BeneVocon™’s official website version. A translation may be provided for accessibility; mandatory law prevails over any inconsistent wording.
